

Question No 01:

You are executing Tree Search through this graph (i.e., you do not remember previously visited nodes). The start node (= initial state) is S, and the goal node is G. Actual step costs are shown next to each link. Heuristics are given in the following table. Apply the both A* and Best first search Algorithm.

h(S)	5
h(B)	4
h(C)	5
h(D)	3
h(E)	4
h(F)	1
h(G)	0

**Question No 02:**

Consider the search graph given below with S as the start state and J as the goal state
